

IN THE CLAIMS:

Please amend Claims so as to read as follows:

1. (Canceled, without prejudice)
2. (Canceled, without prejudice)
3. (Canceled, without prejudice)
4. (Canceled, without prejudice)
5. (Canceled, without prejudice)
6. (Canceled, without prejudice)
7. (Canceled, without prejudice)
8. (Canceled, without prejudice)
9. (Canceled, without prejudice)

10. Canceled, without prejudice.

11. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,
a display means, and
a display control means for controlling the display of the data
stored in the storage means on the data display means,
characterized in that:

a remark display control means is provided for visually
displaying a visual confirmation guide for distinguishing a
specified area of data being displayed on the display means,
in that:

the remark display control means moves and displays the
visual confirmation guide,

and in that:

the remark display control means moves the visual
confirmation guide at a speed based on ~~the geometric~~
~~complexity of data~~ complexity of a character or characters
or complexity of image data being displayed by the visual
confirmation guide.

12. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the
data stored in the storage means on the display means,
characterized in that:

a remark display control means is provided for visually
displaying a visual confirmation guide for distinguishing a
specified area of data being displayed on the display means,
in that:

the remark display control means moves and displays the
visual confirmation guide,

and in that:

the remark display control means moves the visual
confirmation guide at a speed based on frequency of data a
character or characters or frequency of image data being
displayed by the visual confirmation guide.

13.(Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data

stored in the storage means on the data display means,

characterized in that:

a remark display control means is provided for visually

displaying a visual confirmation guide for distinguishing a

specified area of data being displayed on the display means,

in that:

the remark display control means moves and displays the
visual confirmation guide,

and in that:

the remark display control means moves the visual
confirmation guide at a speed based on a combination of
~~the geometric complexity of~~ complexity of a character or
characters or complexity of image data being displayed with
~~the frequency of a character or characters or frequency of~~
image data being displayed by the visual confirmation
guide.

14.(Canceled, without prejudice)

15. (Currently Amended) A data storage medium containing a record of a data display program readable by a computer to realize:
a function for displaying a visual confirmation guide using a difference in visibility,
a function for distinguishing displayed data by the displayed visual confirmation guide visually, and
a function for moving or deforming the visual confirmation guide at a speed based on ~~the geometric complexity of~~ complexity of a character or characters or complexity of image data being displayed thereby and/or ~~the frequency of~~ a character or characters or frequency of image data being displayed thereby so as to make the data displayed thereby easier to read.

16. (Canceled, without prejudice)

17. (Canceled, without prejudice)

18. (Canceled, without prejudice)

19. (Canceled, without prejudice)

20. (Canceled, without prejudice)

22. (Canceled, without prejudice)

23. (Canceled, without prejudice)

24. (Canceled, without prejudice)

25. (Canceled, without prejudice)

26. (Canceled, without prejudice)

27. (Canceled, without prejudice)

28. (Canceled, without prejudice)

29. (Canceled, without prejudice)

30. (Canceled, without prejudice)

31. (Canceled, without prejudice)

32. (Canceled, without prejudice)

33. (Canceled, without prejudice)

34. (Canceled, without prejudice)

35. (Canceled, without prejudice)

36. (Canceled, without prejudice)

37. (Canceled, without prejudice)

38. (Canceled, without prejudice)

39. (Canceled, without prejudice)

40. (Canceled, without prejudice)

41. (Canceled, without prejudice)

42. (Canceled, without prejudice)

43. (Canceled, without prejudice)

44. (Canceled, without prejudice)

45. (Canceled, without prejudice)

46. (Canceled, without prejudice)

47. (Canceled, without prejudice)

48. (Canceled, without prejudice)

49. (Canceled, without prejudice)

50. (Canceled, without prejudice)

51. (Canceled, without prejudice)

52.(Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of
the data stored in the storage means on the data
display means, characterized in that:

a remark display control means is provided for
visually displaying a visual confirmation
guided for distinguishing a specified area of
data being displayed on the display means,
in that:

the remark display control means visually
distinguishes the data being displayed with
the visual confirmation guide from the data
being displayed by said specified area of the
display means by deforming the data being
displayed by said specified area of the display
means or adding information thereto and
thereafter displaying the distinguished data
with the visual confirmation guide,

in that:

the remark display control means moves and
displays the visual confirmation guide,

and in that:

the remark display control means moves or
deforms the visual confirmation guide at a
speed based on the geometric complexity of a
character or characters or complexity of image
data being displayed by the visual
confirmation guide.

53. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the
data stored in the storage means on the data display
means,

characterized in that:

a remark display control means is provided for visually
displaying a visual confirmation guide for
distinguishing a specified area of data being
displayed on the display means,

in that:

the remark display control means deforms and displays the
visual confirmation guide,

and in that:

the remark display control means deforms the
visual confirmation guide at a speed based on ~~the~~
geometric complexity of character or characters or
the complexity of image data being displayed by the
visual confirmation guide.

54. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means.

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means deforms and displays the visual confirmation guide,

and in that:

the remark display control means deforms the visual confirmation guide at a speed based on ~~the geometric~~ complexity of a character or characters or the complexity of the image data being displayed by the visual confirmation guide.

55.(Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means,

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means moves and displays the visual conformation guide,

and in that:

the remark display control means moves or deforms the visual confirmation guide at a speed based on ~~the~~ frequency of a character or character or frequency of image data being displayed by the visual confirmation guide.

56. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the
data stored in the storage means on the data display
means,

characterized in that:

a remark display control means is provided for visually
displaying a visual confirmation guide for
distinguishing a specified area of data being
displayed on the display means,

in that:

the remark display control means deforms and displays
the visual confirmation guide,

and in that:

the remark display control means deforms the visual
confirmation guide at a speed based on ~~the~~ frequency of a
character or characters or the frequency of image data
being displayed by the visual confirmation guide.

57. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means.

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means deforms and displays the visual confirmation guide,

and in that:

the remark display control means deforms the visual confirmation guide at a speed based on ~~the~~ frequency of a character or characters or the frequency of image data being displayed by the visual confirmation guide.

58. (Currently Amended) A data_displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means,

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means moves and displays the visual confirmation guide,

and in that:

the remark display control means moves or deforms the visual confirmation guide at a speed based on a combination of ~~the geometric~~ complexity of a character or characters or the complexity of image data being displayed by the visual confirmation guide with ~~the frequency of~~ a character or characters or the frequency of image data being displayed by the visual confirmation guide.

59. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the
data stored in the storage means on the data display
means,

characterized in that:

a remark display control means is provided for visually
displaying a visual confirmation guide for
distinguishing a specified area of data being
displayed on the display means,

in that:

the remark display control means deforms and displays
the visual confirmation guide,

and in that:

the remark display control means deforms the
visual confirmation guide at a speed based on a
combination of ~~the geometric~~ complexity of a
character or characters or the complexity of image
data being displayed by the visual confirmation guide
with ~~the frequency of~~ a character or characters or the
frequency of image data being displayed by the visual
confirmation guide.

60. (Currently Amended) A data displaying device comprising:

a storage means with data stored therein,

a display means, and

a display control means for controlling the display of the data stored in the storage means on the data display means, characterized in that:

a remark display control means is provided for visually displaying a visual confirmation guide for distinguishing a specified area of data being displayed on the display means.

in that:

the remark display control means visually distinguishes the data being displayed with the visual confirmation guide from the data being displayed by said specified area of the display means by deforming the data being displayed by said specified area of the display means or adding information thereto and thereafter displaying the distinguished data with the visual confirmation guide,

in that:

the remark display control means deforms and displays the visual confirmation guide,

and in that:

the remark display control means deforms the visual confirmation guide at a speed based on a combination of ~~the geometric~~ complexity of a character or characters or the complexity of the image data being displayed by the visual confirmation guide with ~~the frequency of~~ a character or characters or the frequency of image data being displayed by the visual confirmation guide.

61. (Canceled, without prejudice)

62. (Previously Presented) A data displaying device as defined in any one of Claims 11, 12, 13, 52, 53, 54, 55, 56, 57, 58, 59 or 60, further characterized in that:
the remark display control means displays the visual confirmation guide superimposed on data being displayed on the display means.
